# EVERGREEN MARINE CORPORATION AND SUBSIDIARIES CONSOLIDATED FINANCIAL STATEMENTS WITH REPORT OF INDEPENDENT AUDITORS FOR THE YEARS ENDED DECEMBER 31, 2006 AND 2005

The reader is advised that the accompanying consolidated financial statements have been prepared originally in Chinese. In the event of a conflict between these financial statements and the original Chinese version or difference in interpretation between the two versions, the Chinese language financial statements shall prevail.

#### **English Translation of a Report Originally Issued in Chinese**

#### **Report of Independent Auditors**

The Board of Directors and Stockholders Evergreen Marine Corporation

We have audited the accompanying consolidated balance sheets of Evergreen Marine Corporation (the "Company") and its subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in stockholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the consolidated financial statements of Peony Investment S.A., a subsidiary of the Company, and its affiliated companies. Those statements were audited by other auditors whose report has been furnished to us, and our opinion expressed herein, insofar as it related to amounts included for Peony Investment S.A. and its affiliated companies, is based solely on the report of other auditors. Those statements reflect total assets of 79,486,601 thousand New Taiwan dollars and 85,561,120 thousand New Taiwan dollars, constituting 64.78% and 65.77% of the consolidated total assets as of December 31, 2006 and 2005, respectively, and reflect net operating revenues of 116,704,249 thousand New Taiwan dollars and 99,036,290 thousand New Taiwan dollars, constituting 77.76% and 70.37% of consolidated net operating revenues for the year then ended, respectively. In addition we did not audit the financial statements of all the investee companies accounted for under the equity method. Those statements were audited by other auditors whose reports have been furnished to us and our opinion expressed herein, insofar as it related to amounts included for these investee companies accounted for under the equity method, is based solely on the reports of other auditors. Those statements reflect long-term investments of 18,160,180 thousand New Taiwan dollars and 18,516,002 thousand New Taiwan dollars, constituting 14.80% and 14.23% of the consolidated total assets as of December 31, 2006 and 2005 respectively, and reflect investment loss of 1,261,266 thousa

We conducted our audits in accordance with the "Regulations for Auditing and Certification of Financial Statements by Certified Public Accountants" and auditing standards generally accepted in the Republic of China on Taiwan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Evergreen Marine Corporation and its sudsidiaries as of December 31, 2006 and 2005, and the results of its operations and its cash flows for the years then ended in conformity with the "Business Accounting Law", "Guidelines for Preparation of Financial Reports by Securities Issuers" and accounting principles generally accepted in the Republic of China on Taiwan.

As discussed in Note C to the accompanying consolidated financial statements, effective from January 1, 2006, the Company and its subsidiaries have adopted the ROC SFAS No.34, "Accounting for Financial Instruments" and No.36, "Disclosure and Presentation of Financial Instruments".

March 23, 2007 Taipei, Taiwan Republic of China

#### Notice to Readers

The accompanying consolidated financial statements are intended only to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China on Taiwan and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China on Taiwan.

# EVERGREEN MARINE CORPORATION AND SUBSIDIARIES Notes to Consolidated Financial Statements December 31, 2006 and 2005

(Expressed in New Taiwan Thousand Dollars unless otherwise stated)

#### A. ORGANIZATION AND OPERATIONS

The accompanying consolidated financial statements cover Evergreen Marine Corporation (the "Company"), its subsidiary-Taiwan Terminal Services Co., Ltd., and Peony Investment S.A., and its affiliated companies. Backgrounds of the Company and the related subsidiaries are summarized below.

- (1) The Company was established on September 25, 1968 and was approved by the Securities and Futures Commission (SFC), Ministry of Finance (MOF) (currently known as the Securities and Futures Bureau (SFB), Financial Supervisory Commission, Executive Yuan), to be a public company on November 2, 1982. It was further approved by the SFC to be a listed company on July 6, 1987. Shares of the Company have been traded on the Taiwan Stock Exchange since September 21, 1987. The Company is mainly engaged in domestic and international marine transportation, shipping agency services and distribution of containers.
- (2) Taiwan Terminal Services Co., Ltd. (TTSC) was established in Taiwan in October 1997 and is 55% owned by the Company. The principal activities of TTSC are cargo loading and discharging.
- (3) Peony Investment S.A. (Peony) was established by the Company in Panama as a wholly-owned subsidiary in April 1993 to pursue transportation-related investment opportunities around the world.
- (4) Greencompass Marine S.A. (GMS) was established by Peony in Panama in January 1994 with a 100% equity interest. GMS is mainly engaged in container shipping.
- (5) Clove Holding Ltd. (Clove) was established by Peony in the British Virgin Islands (BVI) in March 2001 with a 100% equity interest. Clove is primarily engaged in investments of container yards and terminals.
- (6) Vigor Enterprise S.A. (Vigor) was established by Peony in Panama in April 1997 with a 100% equity interest. Vigor is mainly engaged in investments of container manufacturing.
- (7) Hatsu Marine Ltd. (HML) was acquired by Peony in UK in April 2001 with the main activity in container shipping. As of December 31, 2006, the Company's equity interest in HML was 51%.
- (8) Evergreen Heavy Industrial Corp. (Malaysia) Sdn. Bhd. (EHIC(M)) was acquired by Peony in November 1998 with the main business in the manufacturing of dry steel containers, container parts and other related parts. The Company's equity interest in EHIC(M) as of December 31, 2006 was 84.44%.

- (9) Armand Investment (Netherlands) N.V. (Armand N.V.) was established by Peony in Netherlands in October 2003 with the main business in inland transportation, transshipment and repairs of containers.. The Company's equity interest in Armand N.V. as of December 31, 2006 was 70%.
- (10) Shenzhen Greentrans Transportation Co., LTD (SGTC) was established by Peony in China in March 1998 with the main business in loading, discharging, storage, repairs, cleaning, and inland transportation of containers. The Company's equity interest in SGTC as of December 31, 2006 was 55%.
- (11) PT. Multi Bina Pura International (MBPI) was established by Peony in Indonesia in 1994. MBPI is mainly engaged in container storage and inspections of containers at the customs house. The Company's equity interest in MBPI as of December 31, 2006 was 95.3%.
- (12) PT. Multi Bina Transport (MBT) was acquired by MBPI and Peony in April 1998 and December 2002, respectively. The major activities of MBT are inland transportation, repairs and cleaning of containers. As of December 31, 2006, the total equity interest of MBT held by the Company was 86.91%.
- (13) Island Equipment LLC (Island) was acquired by HML and Clove in April 2004 and is mainly engaged in investments of operating machinery and equipment of port terminals. The total equity interest of Island held by the Company as of December 31, 2006 was 43.65%.
- (14) Ample Holding Ltd. (Ample) was established by Clove in March 2001 with the main business in investments of container yards and docks. The Company's equity interest in Ample as of December 31, 2006 was 90%.
- (15) Armand Estate B.V. (Armand B.V.) was acquired by Armand N.V. with a 100% equity interest in October 2003. The principal activity of Armand Estate is investing in container yards and docks.
- (16) Whitney Equipment LLC (Whitney) was established by Island in Delaware, USA in June 2005 with 100% equity interest. Whitney is mainly engaged in investments and leases of operating machinery and equipment of port terminals.
- (17) Hemlock Equipment LLC (Hemlock) was established by Island in Delaware, USA in June 2005 with 100% equity interest. Hemlock is mainly engaged in investments and leases of operating machinery and equipment of port terminals.

The Company and its subsidiaries had 3,529 and 3,062 employees as of December 31, 2006 and 2005, respectively.

#### **B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The consolidated financial statements are prepared in conformity with the "Business Accounting Law", "Guidelines for Preparation of Financial Reports by Securities Issuers" and accounting principles generally accepted in the Republic of China on Taiwan. The significant accounting polices are summarized below.

#### 1. Basis for preparation of consolidated financial statements

- (1) Effective from January 1, 2005 as pursuant to the newly revised Statement of Financial Accounting Standards (SFAS) No.7, "Consolidated Financial Statements", the Company is required to consolidate accounts of the investee companies of which the Company directly or indirectly holds more than 50% of the common stocks, or over which the Company can exercise significant influence except in situations where the individual total asset or total operating revenue of investees are determined immaterial.
- (2) The accompanying consolidated financial statements are prepared in accordance with the SFAS No. 7, "Consolidated Financial Statements". Transactions between the consolidated entities are eliminated. The resulting difference between the initial investments and the net worth of the respective investee companies is amortized on a straight-line basis over 5 years. However, effective from January 1, 2006, differences attributable to goodwill is no longer amortized and neither is any previously amortized amount reversed. The remaining unamortized carrying amount and any incremental differences attributable to goodwill is recognized in accordance with the guidelines related to amortization of acquisition costs as stated in the Statement of Financial Accounting Standards (SFAS) No.25, "Business Combination Purchase-Price Accounting". Goodwill is measured as at the initial investment cost less the accumulated impairment loss and subsequently remeasured every year as pursuant to the SFAS No. 35, "Accounting for Asset Impairment".
- (3) Where the Company holds more than 50% voting shares of an investee (including the existing and potential voting shares held by the Company and its subsidiaries) or any of the following conditions is met, the Company is deemed to have controlling power in such investee. Such investee must be accounted for by the equity method and included in the consolidated financial statements.
  - (a) Under the agreements entered into by the Company with other investors, the equivalent voting shares of the investee held by the Company exceed 50%.
  - (b) Under the applicable regulations or agreements, the Company can control the investee's financial, operational and personnel policies.
  - (c) The Company has the right to employ or dismiss more than 50% of the members of the Board (or equivalent organization) in which the controlling power over the investee lies.
  - (d) The Company controls more than 50% of the voting rights in the investee's Board (or equivalent organization) in which the controlling power over the investee lies.
  - (e) The Company has controlling power in other matters.
- (4) The financial statements of foreign subsidiaries are prepared in each foreign subsidiary's functional currency. When preparing consolidated financial statements, the exchange rate used for translating assets and liability is the rate prevailing on the balance sheet date, the exchange rate used for translating shareholders' equity is historical rate, and the exchange rate used for translating income statement accounts is the weighted-average exchange rate. Exchange gains or losses resulting from the foreign currency translation should be recorded as the accumulated translation adjustments under separate component of stockholders' equity.

#### (5) The subsidiaries included in the consolidated financial statements are set forth below:

			Owners	ship (%)	
_	_			December 31	- ·
Investor	Investee	Business Scope	2006	2005	Remark
The Company	TTSC	Cargo loading and discharging	55.00	55.00	
	Peony	Investments in transport-related businesses	100.00	100.00	
Peony	GMS	Container shipping	100.00	100.00	
	Clove	Investments in container yards and port terminals	100.00	100.00	
	Vigor	Investments in container manufacturing	100.00	100.00	
	HML	Container shipping	51.00	51.00	
	EHIC (M)	Manufacturing of dry steel containers and container parts	84.44	84.44	
	Armand N.V.	Investments in container yards and port terminals	70.00	70.00	
	SGTC	Loading, discharging, storage, repairs, cleaning and inland transportation of containers	55.00	55.00	
	MBPI	Container storage and inspections of containers at the customs house	95.30	95.30	
	MBT	Inland transportation, repairs and cleaning of containers	86.91	86.91	MBT is 17.39% directly owned by Peony and 72.95% indirectly owned by Peony through MBPI. Therefore, Peony's total equity interest in MBT is 86.91%.

			Ownership (%)		_
			December	December	
Investor	Investee	Business Scope	31, 2006	31, 2005	Remark
Peony	Island	Investments in operating machinery and equipment of port terminals	43.65	43.65	Peony indirectly holds 15% and 36% equity interest in Island through HML and Clove, respectively. Therefore, Peony's total equity interest in Island is 43.65%.
Clove	Ample	Investments in container yards and port terminals	90.00	90.00	
Armand N.V.	Armand B.V.	Investments in container yards and port terminals	100.00	100.00	
Island	Whitney	Investments and leases of operating machinery and equipment of port terminals	100.00	100.00	
	Hemlock	Investments and leases of operating machinery and equipment of port terminals	100.00	100.00	

(6) Changes in subsidiaries that had been included in or exempted from the consolidated financial statements :

None.

(7) Subsidiaries that are not included in the consolidated financial statements:

None.

#### 2. Classification of current and non-current assets and liabilities

(1) Current assets are assets that come from operating activities, which are expected to be converted into cash, consumed, or sold during the operating period; held for trading purposes; expected to be converted into cash within one year from the balance sheet date; as well as cash or cash equivalents except those subject to exchange, curtailment or other restrictions due one year after the balance sheet date. Any assets that are not classified as current are non-current assets.

- (2) Current liabilities are liabilities that come from operating activities, which are expected to be paid off during the operating period; incurred for trading purposes; expected to be paid back within one year from the balance sheet date. Any liabilities that are not classified as current are non-current liabilities.
- (3) Financial liabilities that expire within twelve months from the balance sheet date and match the following terms should be classified as non-current liabilities.
  - a. The original contract term exceeds twelve months.
  - b. Attempt on long-term refinancing.
  - c. Have completed long-term refinancing and extended the period of liabilities before date of the balance sheet, or have the power to refinance or extend the period of liabilities for one year after balance sheet date.

#### 3. Accounting estimation

- (1) In preparation of the consolidated financial statements, the Company makes significant accounting estimations and assumptions in accordance with the generally accepted accounting principles. These estimations and assumptions would affect the amounts of assets and liabilities on the balance sheet date, disclosure of contingent assets and liabilities, and the amounts of revenues and expenses recognized for the accounting period. However, actual result and estimations are subject to potential differences.
- (2) Accrued expenses are recorded at the amounts stated in the original supporting documents. Foreign port charges without supporting documents are estimated as per past records and period-end sailing schedules. Differences between the expenses actually incurred in the following year and the estimated accrued expenses are credited or charged to operating costs or expenses in the following year.

#### 4. Cash and cash equivalents

Cash and cash equivalents are cash, unrestricted bank deposits and other highly liquid investments.

#### 5. Financial assets and financial liabilities

(1) In accordance with the SFAS No. 34, "Accounting for Financial Instruments". The Company classified financial assets into categories such as, financial assets at fair value through profit or loss, held-to-maturity financial assets, available-for-sale financial assets, derivative financial assets for hedge, bonds investment in non-active market, and financial assets accounted for by the cost method. The Company classified financial liabilities into categories such as, financial liabilities as fair value through profit or loss, derivative financial liabilities for hedge, and financial liabilities accounted for by the cost method. Derivative financial instruments that are not designated as effective hedging instruments are classified as financial assets held for trading and financial liabilities held for trading. On initial recognition, financial assets and financial liabilities are measured at fair value. For financial assets and financial liabilities at fair value through profit or loss which are not measured at fair value, transaction costs that are directly attributable to the acquisition or issuance of liability should be capitalized. The Company adopted the trade date accounting for regular purchase or sale. The regular purchase or sale refers to the acquisition or sale of financial assets with a time to delivery within a period generally accepted in the market or standardized by regulations.

### (2) After the initial recognition of financial assets, the Company proceeds with subsequent measurement explained as follows:

#### a. Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are classified into financial assets held for trading and financial assets designated as at fair value through profit or loss at inception. Fair value of listed and OTC Securities is the closing price on the balance sheet date, fair value of mutual fund is the net assets value on the balance sheet date.

#### b. Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and a fixed maturity that the Company has positive intent and ability to hold to maturity as held-to-maturity financial assets. On subsequent measurement, held-to-maturity financial assets are carried at amortized cost. Any profits or losses incurred due to changes in fair value should be recognized in income statement when recognizing impairments or amortization. The amortised cost is calculated as the amount at which the asset is measured at initial recognition minus any repayments of principal, plus or minus the cumulative amortization using the effective interest rate method of the difference between that initial amount and the maturity amount and minus any reduction for impairment or uncollectibility. While determining cash flows associated with the financial instruments for calculating the effective interest rate, the Company takes into consideration the contract terms of financial instruments including transaction fees paid or received, premiums or discounts and transaction cost...etc.

#### c. Debt investments with no active market

Debt investments with no active market are financial assets with fixed or determinable payments that are not quoted in active market. Such assets are carried at amortized cost using the effective interest method. Gains or losses are recognized when such investments are derecognized, impaired, or amortized.

#### d. Available-for-sale financial assets

Available-for-sale financial assets include assets that are available for sale and all other non-derivative financial assets that do not fit into any of the three categories of financial assets mentioned above. Available-for-sale financial assets are measured at fair value. All changes in fair value, except impairment losses and foreign exchange rate losses for monetary financial assets, are recognized directly in equity until the asset is derecognized. When the financial asset is derecognized, the cumulative gain or loss that was previously recognized in equity is recognized in profit or loss in the income statement.

#### e. Derivative financial assets held for hedging purpose

Derivative financial assets held for hedging purpose are those that are designated as effective hedging instrument under hedge accounting. On subsequent measurement, derivative financial assets held for hedging purpose are carried at fair value. The fair value of listed company is closing price and of open-ended fund is net assets value on balance sheet date. The so-called fair value refers to the closing market price for listed equity securities and the net asset value on the balance sheet date for open-ended mutual funds.

#### f. Financial assets carried at cost

Financial assets carried at cost are those with fair values that can not be reliably measured and are traded in non- active market without public price, and derivative financial instruments linked to and completed by the financial assets. On subsequent measurement, financial assets carried at cost are measured at cost.

(3) The subsequent measurement for financial liabilities is measured at amortized cost. For financial liabilities at fair value through profit or loss and derivatives financial liabilities, the fair value is applied for measurement. For linked derivative financial liabilities that are traded in non-active market without reliable fair value, cost method is applied for measurement. The financial liabilities that are designated as hedging instruments should be accounted for under hedge accounting.

#### 6. Derecognition of Financial assets and liabilities

- (1) All or part of a financial asset is derecognized when the contractual rights that compose the asset expire. When all or part of a financial asset is transferred and contractual rights that composes the asset is given up, the cash flow received from the clearing house within a certain limit is treated as sale. When the transfer of financial asset does not qualify as lost of contractual rights, then such transfer of asset is recognized as guaranteed loan. Reacquiring rights of such assets will no longer be accounted as derivative financial assets.
- (2) All or part of a financial liability is derecognized when the obligation specified in the contract binding the financial liability is either discharged, cancelled or expired. Where there has been an exchange between an existing borrower of debt instruments and the Company with substantially different terms, or there has been a substantial modification of the terms of an existing financial liability, then the transaction is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Any gain or loss from extinguishment of the original financial liability is recognized in the income statement.

#### 7. Allowance for doubtful accounts

The allowance for doubtful accounts is provided based on the collectibility and aging analysis of notes and accounts receivable and other receivables.

#### 8. Inventories

Fuel inventories are physically measured by the crew of each ship and reported back to the Head Office through telegraph for recording purpose at year-end. Valuation of inventories is based on the exchange rate prevailing at the end of the fiscal year.

#### 9. Long-term equity investments accounted for by the equity method

- (1) The equity method is applied where the Company holds more than 20% of the voting shares and can exercise significant influence over the investees. between the investment cost and the stocks' net worth is amortized over five years on a straight-line basis. Effective from January 1, 2006, pursuant to the revised statement of Financial Accounting Standards No. 5 "Long-term Investments in Equity Securities", the difference between initial investments and the stocks' net worth is no longer amortized. The amortized amount can not be reversed. The unamortized amount which the investment cost is greater than the stock's net worth should be recognized as goodwill, the unamortized amount which the investment cost is less than the stock's net worth should be recognized as deferred liability. Any additional difference is recognized in accordance with the guidelines related to amortization of acquisition cost, as stated in the SFAS No. 25. "Business Combination-Purchase Price Accounting". The unrealized revenue which occurred between the Company and its investee or occurred between investees in the period should be eliminated. companies of which the Company holds more than 50% of voting shares, not only the equity method should be applied for the valuation of subsidiaries, but also the consolidated financial statement should be prepared.
- (2) Foreign currency denominated financial statements of overseas subsidiaries and investees are translated into New Taiwan dollars in accordance with the Statement of Financial Accounting Standards (SFAS) No. 14, "Accounting for Foreign Currency Transactions and Translation of Foreign Financial Statements". The translation differences are recorded as "cumulative translation adjustments" under stockholders' equity.

#### 10. Property, plant and equipment

- (1) Property, plant and equipment are stated at cost plus capitalized interest and less accumulated depreciation and impairment. Expenditures incurred on major improvements or renewals that will increase the efficiency or prolong the useful lives of the assets are capitalized. Other expenditures related to regular maintenance and repairs are expensed as incurred. Gains or losses on disposal of property, plant and equipment are credited or charged to non-operating income in the year of disposal.
- (2) Depreciation is calculated on a straight-line basis according to the respective assets' useful lives regulated by the Authority plus one year for salvage value.
- (3) For ships and equipment that are still in use after expiration of their useful life, depreciation is provided based on the original method and the reassessed useful life and salvage value. For other assets that are still in use after expiration of their useful life, depreciation is provided based on the original method to the extent that the salvage value falls below \$3,000. Where impairment loss is recognized, property, plant and equipment shall be depreciated over their remaining useful life based on their carrying value adjusted for the impairment loss.

#### 11. Asset impairment

- (1) Pursuant to SFAS No. 35, the Company assesses indicators for impairment for all its assets within the scope of SFAS No. 35 on each balance sheet date. If impairment indicators exist, the Company shall then compare the carrying amount with the recoverable amount of the assets or the cash-generating unit ("CGU") and write down the carrying amount to the recoverable amount where applicable. Recoverable amount is defined as the higher of fair values less costs to sell and the values in use. For previously recognized losses, the Company shall assess, on each balance sheet date, whether there is any indication that the impairment loss may no longer exist or may have decreased. If there is any such indication, the Company is required to recalculate the recoverable amount of the asset. If the recoverable amount increases as a result of the increase in the estimated service potential of the assets, the Company shall reverse the impairment loss to the extent that the carrying amount after the reversal would not exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the assets in prior years. Impairment loss (reversal) is classified as non-operating losses/(income).
- (2) The Company assesses the financial assets whether there is any objective evidence of impairment for all financial assets within the scope of SFAS No. 35 on each balance sheet date. Impairment calculation and recognition for financial assets with different valuation model is as follows:

#### a. Financial assets carried at amortized cost

When there is an objective evidence of impairment for financial assets carried at amortized cost, the impairment value is measured as the difference between the carrying amount and the present value of the expected future cash flows discounted at the original effective rate. The carrying amount of the financial assets is reduced through an allowance account, and impairment loss is recognized as profit or loss for the period. If, in a subsequent period, the amount of the impairment loss decreases, and the amount of the impairment loss is clearly due to on event occurring after the initial recognition of impairment, the previously recognized impairment loss can be reversed through allowance account. However, the carrying value of financial assets should not exceed the amortized cost of unrecognized impairment after reverse. The reversed amount should be recognized in the income statement.

#### b. Financial assets carried at cost

When there is an objective evidence of impairment for investments in unquoted equity instruments, the impairment loss is recognized as loss for the period. The amount for impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated cash flows discounted at the financial asset's effective interest rate at the time. Reversal of impairment loss recognized is not allowed for these assets.

#### c. Available-for-sale financial assets

When there is an objective evidence of impairment for available-for-sale financial assets, the cumulative net loss that had been recognized from equity is removed and recognized in profit or loss for the period. The amount to be recognized for impairment is the difference between the acquisition cost (minus principal recovered and any adjustments to amortization) and the current fair value or the recoverable amount with further deduction of the remaining amount of such financial assets after impairment loss has been deducted. If, in a subsequent period, the amount of the impairment loss decreases, such deduction in the amount of impairment loss for available-for-sale equity instruments can not be recognized in the income statement, but rather as adjustments in equity. However, if the subsequent decrease in the amount of the impairment loss is clearly due to an event occurring after the initial recognition of impairment, the previously recognized impairment loss can be reversed through profit or loss.

#### 12. Deferred charges

Deferred charges refer to the expenses incurred on the use of decoration, issuance of corporate bonds, computer software and cable installation. The charges are amortized on a straight-line basis over five years for the use of decoration and the issuing period for corporate bond issuance with the rest being amortized over 2-3 years.

#### 13. Convertible bonds

- (1) Pursuant to the newly issued SFAS No.36 "Disclosure and Presentation for financial Instruments", the equity component of the compound financial instrument that issued before the effective date (January 1, 2006) should not be separated from such compound instrument. In accordance with guideline stated in the Letter Chi-Mi-Tze No.78 (95) issued by the Accounting Research and Development Foundation, the embedded derivative instrument that is not composed by equity should be separated with the main contract after judgment, the issuer does not have to separate the derivative component, but must continuously recognize interest compensation and premium or discount. The Company used same accounting method for corporate bonds issued before January 1, 2006. The difference between the issue price and face value of convertible corporate bonds is accounted for as premium or discount which is required to be amortized over the period from the date of issuance to maturity date in accordance with the interest method. Premium or discount on convertible corporate bonds with redemption options is required to be amortized over the period from the date of issuance to the expiry date of the redemption right. The excess of the redemption price over the face value of the convertible bonds is recognized as liability on interest compensation under the interest method during the period from the date of issuance to the expiry date of the redemption right.
- (2) Conversion of convertible bonds is accounted for by the book value method. The unamortized premium or discount, issuance cost, accrued interest payable, interest payable by the bondholders, liability on interest compensation and the face value of the bonds are netted on the date of conversion, and the resulting net amount is reversed accordingly. The excess of the net amount over the par value of the converted stock is recorded as capital surplus.
- (3) Where the bondholders do not exercise the redemption option before it expires, the interest compensation is amortized according to the interest method over the period from the date following the expiry date of the redemption option to the maturity date of the bonds. Where the market price of the stocks that can be converted from the convertible bonds on the expiry date of the redemption option exceeds the redemption price, the interest compensation recognized is reclassified to capital surplus.

#### 14. Pensions

- (1) The Company and its subsidiary-TTSC's pension plans apply to all permanent employees. For the first fifteen years of service, two points are rewarded for each year of service. For service period exceeding 15 years, one point is rewarded for each additional year of service with a maximum of 45 points allowed. Pensions paid upon retirement are based on the service period and the average monthly salary of the six months prior to the approval of retirement.
- (2) The Labor Pension Act ("the Act"), which adopts a defined contribution scheme, takes effect from July 1, 2005. In accordance with the Act, employees of the Company may elect to be subject to either the Act, and maintain their seniority before the enforcement of the Act, or the pension mechanism of the Labor Standards Law. For employees subject to the Act, the Company shall make monthly contributions to the employees' individual pension accounts on a basis no less than 6% of the employees' monthly wages.
- (3) According to the SFAS No.18, "Accounting for Pension", the Company and its subsidiary- TTSC have recognized pension costs based on the actuarial report since 1995 Under the defined benefit pension scheme, net periodic pension cost was contributed according to the actuarial report, which includes current service cost, interest cost, expected rate of return on plan assets, amortization of unrecognized net transition assets. The part of accumulated benefit obligation which exceeds fair value of pension fund was recorded as minimum pension liability on the balance sheet. Unrecognized net transition assets and net benefit obligation are amortized on a straight-line basis over 15 years. Prior service cost and gain or loss is amortized by average remaining service period on a straight-line basis. While preparing interim financial statements, the amount of minimum pension liability was adjusted by the difference between net periodic pension cost and contribution. Under the defined benefit pension scheme, contribution is recognized in the year when the expenditures are incurred. The amount of the minimum pension liability need not be re-evaluated. In accordance to the SFAS No.23 "Presentation and Disclosure for Interim Financial Reports", information related to pension is not disclosed.
- (4) The Company's oversea subsidiaries had not established pension plans as it is not compulsory in countries where oversea subsidiaries are registered.

#### 15. Revenue recognition

Recognition of revenues is accounted for in accordance with the SFAS No. 32, "Accounting for Revenue Recognition".

#### 16. Income taxes

(1) Projected income tax is estimated based on the expected taxable income for the current year. Difference between the estimated tax and the actual tax paid is recorded as an adjustment to income tax expense for the current year. An additional 10% tax is levied on unappropriated retained earnings, which is recorded as income tax expense for the year when the tax is levied.

- (2) Inter-period and intra-period income taxes are allocated in accordance with the SFAS No. 22, "Accounting for Income Taxes". Income tax effects arising from taxable temporary differences are recognized as deferred income tax liabilities. Income tax effects arising from deductible temporary differences, loss carryforwards and income tax credits are recognized as deferred income tax assets and a valuation allowance is provided based on the expected realizability of the deferred income tax assets. Pursuant to the "Basic Income Tax Regulation" which took effect on January 1, 2006, the Company and its subsidiary, TTSC, is now required to consider the minimum expected future income tax payable when assessing the realizability of deferred income tax assets.
- (3) Income tax credits are accounted for in accordance with the SFAS No. 12, "Accounting for Income Tax Credits" and are recognized in the year when the related expenditures are incurred.

#### 17. Basic (diluted) earnings per share

Basic earnings per share are calculated based on the net income (loss) attributed to common stockholders and the weighted-average number of common shares outstanding during the period. Any capital increase (reduction) through cash injection (withdrawal), treasury stock transactions or other factors that would cause a change in the number of outstanding shares are incorporated in the calculation on a weighted-average basis according to the circulation period. Adjustments are made retroactively to the weighted-average number of outstanding shares if there is any increase (decrease) in the number of outstanding shares which does not result in changes in the stockholders' percentage of equity interest. Where the effective dates of the above-mentioned events fall between the balance sheet date and the issue date of the financial statements, retroactive adjustments are also required. For the purpose of calculating diluted earnings per share, it is assumed that the convertible bonds are converted into the common stock on the date of issuance of the bonds, and the weighted-average number of outstanding shares is adjusted for the dilutive effects of the convertible bonds.

#### 18. Foreign currency transactions

#### (1) Exchange of foreign currency transaction

Transactions of non-derivative financial instruments denominated in foreign currencies are recorded at the amount of New Taiwan dollars translated using the exchange rate on the date of the transaction. Any profit or loss incurred due to different exchange rate applied at the time of the actual exchange or settlement is recognized in the income for the current period. The carrying amounts of foreign currency denominated assets and liabilities on the balance sheet date are translated at the exchange rate on that date. In addition, any resulting foreign exchange rate profits or losses are recognized in the income for the current period. However, for equity instruments classified under available-for-sale financial assets, foreign exchange rate profit or loss is recognized as adjustments in equity. Equity instruments accounted for by the cost method is measured at the historical exchange rate on the transaction date. For foreign currency denominated long term investments which are accounted for by the equity method, the measurement is based on the equity reported in the financial statements of the investee companies prepared in foreign currencies adjusted for translations. Foreign exchange rate profit or loss is then recognized as changes in cumulative translation adjustments under equity.

(2) Currency translated basis for foreigner subsidiaries

The foreign currency financial statement of the subsidiaries accounted for under the equity method are translated into New Taiwan dollars. All assets and liabilities are translated by the exchange rate on balance sheet date. Except for the beginning retained earnings which is translated by the exchange rate on the end of prior year, the rest of accounts in equity are translated by the historical rate. The accounts in income statement are translated by the average exchange rate. The difference between the translated amount and the initial cost is recorded as "cumulative translation adjustment" under stockholders' equity.

#### 19. Derivative financial instruments and hedge trading

- (1) Oil swap and interest rate swap are utilized to hedge against fluctuations in interest rates and oil prices. The initial recognition and subsequent valuation of derivative financial instruments are carried at fair value. The assets should be recognized for positive fair values, the liabilities should be recognized for negative fair value.
- (2) The changes in fair value of derivatives are recognized in the income statement when such instrument does not qualify for hedge accounting.

Hedge relationship is classified into following three categories:

- a. Fair value hedges: to mitigate the risk of changes in the fair value of an recognized asset or liability or unrecognized commitment.
- b. Cash flow hedges: to mitigate the risk of volatility in cash flow. The volatility is attributable to a recognized asset or liability (such as all or some future interest payments on variable rate debt) or a highly probable forecast transaction that might affect profit or loss.
- c. Hedge of net investment in a foreign operation: to mitigate the risk of the exchange rate fluctuations associated with net investment in a foreign operation.
  - The Company used cash flow hedge to avoid the exchange risk arising from existing commitments.
- (3) The hedging relationship, hedging management and hedging strategy should be documented at the beginning of a designated hedge. The hedge instruments, related hedge items or transactions and identification of hedged risk, and the method for measuring the hedge effectiveness, should be documented. The Company expected that the hedge could offset the volatility of fair value and cash flow during the period under hedge. The Company also assesses the effectiveness of hedge, and makes sure the hedge is highly effective during the period.

(4) In the case where the hedge trading met the criteria of hedge accounting, the accounting for hedging is set forth bellow:

#### a. Fair value hedge

The fair value hedge is used to mitigate the risk of a fair value change of the recognized assets or liabilities, unrecognized commitment, or designated part of such items, which could arise from certain specific risk and affect income. In a fair value hedge, the gain or loss on the hedged items arising from hedged risks are recognized in the income statement. The gain or loss of derivative financial instrument that is measured at fair value on the subsequent measurement is also recognized in the income statement.

For the fair value hedge associated with hedged items that are initially measured at amortized cost, the adjustment is amortized under effective interest method by the budging period and recognized in the income statement. The amortization begins ether when the adjustment is recognized or when hedge accounting ceased to apply.

For the unrecognized commitment that is designated as a hedge item, the cumulative fair value changes due to hedged risk are classified as assets or liabilities and recognized in the income statement.

The Company discontinues hedge accounting when the hedging instrument is settled, sold, terminated or exercised, no longer qualify for hedge doesn't meet the criteria of hedge relationship, or when the Company decides to revoke the designation.

#### b. Cash flow hedge

Cash flow hedge is to avoid risk of volatility in cash flow, that arises from recognized assets or liabilities, or certain specific risk associated with highly expected transaction and that affect income statement. The gain or loss that is attributable to effective hedge is recognized in equity directly and that is attributable to ineffective hedge is recognized in income statement.

In the case where the expected transaction being hedged is likely to result in the recognition of financial assets or financial liabilities, the gain or loss previously recognized directly as adjustments in equity is to be transferred to income statement as profit or loss in the period when such assets or liabilities affect net income. In other case where the expected transaction under hedge is likely to result in the recognition of non-financial assets or non-financial liabilities, the gain or loss previously recognized directly as adjustments in equity for such hedging instrument is now treated as valuation adjustments to the book value of such assets or liabilities.

When the occurrence of the expected transaction is deemed unlikely, the accumulated profit or loss previously recognized as adjustments in equity is to be recognized as profit or loss for the period. When hedging instruments are matured, sold, terminated or executed, or when the Company cancelled designated hedging instruments under initial recognition, the accumulated amount previously recognized directly as adjustments in equity is to remain in equity as adjustment item when such expected transaction do occur. However, when such expected transaction is not likely to occur, the accumulated amount should be recognized in current income.

c. Hedge of net investment in a foreign operation

Accounting for hedge of net investment in a foreign operation is similar to accounting for cash flow hedge. The hedge instruments are recognized directly in equity when deemed effective and recognized in the income statement when deemed ineffective. Cumulative gains or losses that recognized as adjustment in equity is transferred to income statement upon disposal of foreign operation.

#### C. CHANGES IN ACCOUNTING PRINCIPLES

- 1. Effective from January 1, 2006, the financial instruments of the Company adopt the Statement of Financial Accounting Standard (SFAS) No. 34, "Accounting for Financial Instruments" and SFAS No. 36, "Presentation and Disclosure for Financial Instruments". All financial instruments on hand as of the effective date are recognized according to the followings:
  - (1) Transaction which was designated as a hedge prior to the effective date

For designated hedge transaction prior to the effective date which does not qualify for conditions of an effective hedge accounting is no longer applicable since the effective date. No retroactive adjustments is required for prior year accounting and relative SFAS standards is to be complied with.

(2) Accounting for derivative instruments

The Company recognizes all derivative financial instruments as either assets or liabilities at fair value. With the exception of those designated as hedging instruments, the difference between the carrying value and the fair value of all derivative financial instruments are recognized as cumulative effect of changes in accounting principles.

(3) Accounting for financial instruments at fair value through profit or loss and amortized cost

The Company reclassified its financial assets and financial liabilities at fair value and amortized cost according to appropriated categories as of the effective date and measured each at fair value and amortized cost, respectively. Difference between the carrying value and the fair value of the financial instruments at fair value through profit or loss which is to be measure at fair value is recognized as cumulative effect of changes in accounting principles. Difference between the carrying value and the fair value of the financial instruments either measured at amortized cost or classified under the available-for-sale financial instruments, and the derivatives which are associated with cash flow hedge or net investment hedge for foreign operation are recognized directly in equity.

(4) Accounting for cash flow hedge

The Company reclassified the deferred income and loss incurred for cash flow hedge before the effective date that still qualify for conditions of an effective hedge since effective date to adjustment item in equity.

#### (5) Accounting for the non-monetary assets denominated in foreign currency

The Company revalued the costs of its non-monetary assets denominated in foreign currencies originally carried at costs using the prevailing exchange rate at the trade date. Cumulative loss originally recognized in equity is then transferred among accounts of other financial assets.

The effects on the consolidated financial statement caused by changes in accounting principle adopted by the Company the year ended December 31,2006 are set forth as follows:

2. In accordance with the rule stipulated in the ARDF's Letter (94) Chi-Mi-Tze No.016, the Company adopts the SFAS No.34 in preparation of the comparative financial statements effective from January 1, 2006. Certain accounts in the financial statement for the year ended December 31, 2005 are reclassified relative to the accounts in the financial statement for the year ended December 31, 2006; however, no restatement is mandatory. If different measurement is used for similar accounts for the two comparative periods, difference should be explained in notes to financial statements. When there is difficulty in doing so, pro forma information for prior years needs not to be listed. The Company's use of different accounting policies for measuring financial instruments for the years ended 2005 and 2006 are summarized as follows:

#### (1) Short-term investments

Short-term investments are initially stated at cost determined by the moving weighted-average method and restated at the lower of cost or market value method on the balance sheet date. The market value of listed equity securities is determined by the average closing prices in the last month of the accounting period. The market values for foreign stocks and domestic open-end mutual funds are determined by their closing prices and the net worth per share on the balance sheet date, respectively. Any loss on declines in market value is recorded as current non-operating loss. The loss on the decline in market value or gain on the market price recovery is recorded as current non-operating loss or income. Stock dividends received are accounted for as an increase in the number of shares held rather than investment income, and the average cost per share is recomputed accordingly on a weighted-average basis.

#### (2) Long-term equity investments accounted for by the cost method

- a. Long-term equity investments are stated at historical cost and revalued at the end of the fiscal year. For the investee companies of which the Company holds less than 20% of the voting shares or over which the Company cannot exercise significant influence, the lower of cost or market value method is applied when the investees are listed companies. The unrealized loss resulting from the decline in market value of such investments is charged to stockholders' equity. If the investees are non-listed companies, the cost method is applied. When the loss in investment value is permanent and the possibility of a recovery in value is remote, the book value is adjusted and an investment loss is recognized accordingly.
- b. Long-term investments which was denominated in foreign currency and recorded under cost method were translated by current exchange rate on the balance sheet date. If the translated amount was less than the cost of acquisition, the difference were recorded as "cumulative translation adjustment" under stockholder's equity, if the translated amount was greater than the cost of acquisition, the original cost is retained as the carrying amount.

#### (3) Derivative financial instruments

Disclosure of derivative financial instruments is accounted for in accordance with the SFAS No. 27, "Disclosure of Financial Instruments". The derivative financial instruments undertaken by the Company and the related accounting policies are summarized below.

#### a. Options

Premiums received for options written are recorded as a liability, whereas those paid for options bought are recorded as an asset. When the options are exercised, the premiums are reversed, and the gains or losses arising from the exercise of the option contracts are credited or charged to current income. The options that are outstanding or remain unexercised on the balance sheet date are revalued based on their market prices on that date, and the resulting gains or losses are credited or charged to current income.

#### b. Interest rate swaps

Interest rate swaps undertaken for risk hedging purposes are recorded in the memorandum account on the contract date. The interest received or paid upon each settlement, or accrued on the balance sheet date, is recorded as an adjustment to current interest income or expense.

#### c. Cross currency swaps

Cross currency swap contracts are undertaken for meeting the financing demand in different currencies. Such contracts are accounted for by the difference between the interest received or paid upon each settlement and recorded as adjustments to foreign exchange gain or loss for the period.

#### d. Forward exchange contracts

Forward exchange contracts undertaken to hedge the exchange rate risk arising from foreign currency denominated receivables and payables are recorded at the spot rate on the contract date, and the difference between the spot rate and the contract rate is amortized over the contract period. On the balance sheet date, the contracts are restated based on the spot rate prevailing on that date, and the resulting exchange difference is credited or charged to current foreign exchange gain or loss. The exchange differences arising from the settlement of the contracts are also credited or charged to current foreign exchange gain or loss. For the forward exchange contracts utilized to hedge exchange rate risk arising from foreign operating branches' net investments, the exchange difference is recorded as cumulative translation adjustment under stockholders' equity.

#### e. Oil swaps

Oil swap contracts are undertaken to hedge the risks of fluctuations in oil prices. The amount received or paid on the settlement date is credited or charged to current fuel expense.

Certain accounts in the financial statements as of and for the year ended December 31, 2005 have been reclassified to conform to the classifications prescribed by the "Guidelines for Preparation of Financial Reports by Securities Issuers" and the newly released and revised SFAS. The reclassifications of the entire, or a part of, the account balance of certain accounts are summarized as follows:

	December 31, 2005

3. According to the standards stipulated in the newly revised SFAS No.1 "Concepts of Financial Accounting and Preparation of Financial Statements", No.5 "Accounting for Long-Term Equity Investments" and No.25 "Business Combination – Purchase-Price Accounting" which took effect on January 1, 2006, the difference between costs of long-term equity investments accounted by the equity method and the net worth of investee's equity is to be recognized in accordance to guidelines for amortization of acquisition costs outlined in SFAS No.25 "Business Combination – Purchase-Price Accounting". Investment costs in excess of the net worth of investee's equity is no longer amortized, but evaluated for impairment on a periodic basis. Such changes in accounting principles have no effect on the consolidated net income and consolidated earnings per share for the year ended December 31, 2006.

#### D. DETAILS OF SIGNIFICANT ACCOUNTS

#### 1. Cash and cash equivalents

	December 31, 2006	December 31, 2005
Cash	\$14,306	\$92,215
Checking account deposits	35,092	46,323
Demand deposits	17,960	19,318
Foreign currency deposits	1,705,377	4,284,382
Time deposits (New Taiwan dollars)	1,505,300	167,325
Time deposits (foreign currencies)	6,843,788	10,654,550
Cash equivalents - reverse repurchase bonds	-	80,000
Less: Unrealized foreign exchange (loss) gain	(21,685)	(109,455)
Total	\$10,100,138	\$15,234,658

- (1) The interest rates on the above time deposits for December 31, 2006 and 2005 ranged from 0.18% to 12.50%, and 1.40% to 14.75%, respectively.
- (2) The interest rate on the reverse repurchase bonds for December 31, 2005 was 1.40%.

#### 2. Financial assets at fair value through income statement

	December 31, 2006	December 31, 2005
Financial assets held for trading		
Bonds investment	\$13,948	\$60,587
Equity securities	94,081	263,660
Beneficiary certificate	2,891,242	4,289,345
Interest rate swap (IRS)	43,654	-
Cross Currency swap (CCS)	2,942	-
Structural financial instrument	790,916	909,258
Equity-linked financial instrument		30,000
Subtotal	3,836,783	5,552,850
Add(Less): Valuation adjustment	22,412	(60,745)
Net	\$3,859,195	\$5,492,105

- (1) Effective from January 1, 2006, above financial assets are reclassified as financial assets held for trading. Under the SFAS No.34 "Accounting for financial instrument", the fair value recognition method resulted in a favorable cumulative effect of changes in accounting principle of 91,182 thousand (after tax) which is included in the consolidated net income for December 31, 2006.
- (2) As of December 31,2006 and 2005, financial assets resulted from outstanding interest rate swaps are set forth below:

- a. In the second quarter of 2005, the Company assessed a decline in value of the investment in Well Long Information Co., Ltd., and that the investment cost could not be recovered. As a result, a realized investment loss of \$1,300 thousand was recognized based on the carrying value and recorded under non-operating expenses other investment loss.
- b. In July 2006 and 2005, Power World Fund Inc. (PWF) reduced its capital at a rate equivalent to 339.3 shares and 454.5 shares, respectively, for every 1,000 old shares held, and the amount returned to the stockholders was \$10 (par value) per share. As a result of capital reduction, proceeds received by the Company proportional to its percentage of equity holdings in PWF amounted to \$9,261 thousands and \$22,727 thousands, respectively, and the carrying amount of the Company's investment in PWF was written down by \$9,261 thousand and \$22,727 thousand, respectively. No gain or loss had incurred.
- c. On October 4, 2006, the Company's Board of Directors passed a resolution to participate in the issuance of common stocks for cash by Top Logis Inc. and acquired 962 thousand common shares and 1,502 thousand preferred shares at \$2.01 and \$0.4 per share, respectively; adding up to a total investment of \$22,100 thousand which is recorded under financial assets carried at cost.
- d. The shares of Classic Outlook Investment Ltd. and Everup Profits Ltd. have been pledged as collaterals for the loans borrowed by Clove Holding Ltd. Please refer to Notes D22 and F for details.
- e. The subsidiary-Peony previously pledged 300,000 shares of Dongbu Pusan Container Terminal Co., Ltd. (DPCT) as collaterals for DPCT's borrowings. In the first half year of 2005, the collaterals were dissolved with a new agreement, and the pledged stocks were taken back by Peony. Under the new agreement, Peony should provide DPCT's stocks as collateral while DPCT has debts occurred.

#### (4) Debt investment with no active market:

		Coupon	December	December
Item	Period	rate	31, 2006	31, 2005
Convertible Bond – Tuntex	03.10.05~	0%	\$9,686	\$12,581
	03.10.13			
(Thailand) Public Company Limited				
Plus: unrealized exchange gain			1,445	-
Less: Cumulative translation			-	-
adjustment				
Total			\$11,131	\$12,581

a. In 1997, the Company purchased USD180 thousand of the convertible bonds issued by Tuntex (Thailand) Public Company Limited. As Tuntex encountered financial difficulties, it defaulted at maturity of the bonds. Accordingly, the Company fully recognized the losses on the bonds in 2001. Tuntex subsequently filed an application to the court for corporate restructuring and reached a consensus with the creditors to reissue the above-mentioned bonds. The convertible bonds allocated to the Company were recorded at their face value of THB15,737 thousand (NT\$12,581 thousand), and the Company recognized \$12,581 thousand income under "non-operating income – others" for the year ended December 31, 2005.

- b. Effective from January 1, 2006, the Company reclassified above financial assets as Bonds investment with no active market-non-current which was also restated at amortized cost and adjusted by the prevailing exchange rate on the effective date under the SFAS No.34 " Accounting for Financial Instruments". Such adjustment resulted in an unfavorable unrealized loss of \$367 thousand (after tax) which is be carried under equity and not to be included in the consolidated net income for the year ended December 31, 2006.
- c. For above stock conversion right of convertible bonds, please refer to Note D.20.
- d. As of December 31, 2006 and 2005, none of above financial asset has been pledged as collateral.

- (1) Please refer to Note E for details of the transactions on property, plant and equipment with related parties and Note F for details of the assets pledged as collaterals.
- (2) All the aforementioned ships and equipment have been insured based on the market value of each vessel or the requirement of the creditor banks. As of December 31, 2006 and 2005, the insurance coverage amounted to USD1,675,260 thousand and USD844,500 thousand, respectively. In addition, the ships were covered by the protection and indemnity insurance with GARD. The indemnity amount was unlimited except for oil pollution which was limited to USD 8 billion for the year ended December 31, 2006 and 2005.
- (3) The Company's loading/discharging equipment has been covered by the general insurance for construction machinery with insurance coverage amounting to \$6,474,428thousand and \$5,221,511 thousand as of December 31, 2006 and 2005, respectively. The fire insurance coverage for office equipment was \$3,976,419 thousand and \$2,336,493 thousand as of December 31, 2006 and 2005, respectively. Container facilities were insured with full coverage amounting to USD703,448 thousand and USD489,093 thousand as of December 31, 2006 and 2005, respectively..
- (4) The Company entered into a construction agreement with Kaohsiung Harbor Bureau to complete the extension project of Pier No. 116 of Kaohsiung Harbor. The Company is entitled to use the pier free of charge for 16 years commencing from the date of completion. At expiration of the 16-year period, the Company is obliged to return the pier to the Bureau but has the priority to lease the pier. The construction project was reclassified to dock facilities upon its completion on January 1, 1992, and is amortized on a straight-line basis over 16 years with the amortization charged to loading/discharging expenses.
- (5) The Company entered into a construction agreement with Kaohsiung Harbor Bureau to complete the extension project of Piers No. 79~81 of Kaohsiung Harbor. The Company is entitled to use the piers free of charge for 10 years commencing from the date of completion. At expiration of the 10-year period, the Company is obliged to return the piers to the Bureau but has the priority to lease the piers. The construction project was reclassified to dock facilities upon its completion in the beginning of 2000, and is amortized on a straight-line basis over 10 years with the amortization charged to loading/discharging expenses.

#### 12. Long-term installment receivables

	December 31, 2006	December 31, 2005

- (1) Effective from January 1, 2006, the Company recorded those that qualify as effective hedging instrument under the SFAS No.34 " Accounting for Financial Instruments" at fair value which resulted in an unfavorable loss of \$56,681 thousand (after tax) to be carried under equity and not to be included in the consolidated net income for the year ended December 31,2006.
- (2) The disclosure of interest rate risk, credit risk and fair value for the above derivative financial liabilities, please refer to Note J.

### 20. Financial liabilities carried at cost-non current

		Conversion	December 31,	December
	Item	date	2006	31, 2005
Stock conversion	Tuntex (Thailand) Public	03.10.13		
right	Company Limited		\$9,004	<b>\$-</b>

Above financial liability is the embedded stock conversion right obtained by the Company through acquisition of convertible corporate bond issued by the Tuntex (Thailand) Public Company Limited (the TUNTEX) during the first quarter of 2005. As stated in the terms of the agreement, the TUNTEX can choose either to pay back by cash at face value of corporate bonds (THB15,737 thousand dollars) or convert to stock on the maturity date. On initial acquisition, such transaction was not recorded separately; however, in according with the SFAS No.34 "Accounting for financial instruments" effective from January 1, 2006, the initial acquisition amount of convertible bonds were to be discounted at the effective interest rate, resulting in a present value of THB 11,263 thousand (conversion into NTD 9,004 thousand dollars). As a result, a unfavorable unrealized loss 9,004 thousand dollars( after tax) was recognized in equity, not included in the net income for the year ended December 31, 2006, and subsequently measured at cost with historical exchange rate.

### 21. Corporate bonds payable

Eighth secured corporate bonds	\$-	\$1,500,000
Ninth secured corporate bonds	1,000,000	1,000,000
Tenth secured corporate bonds	1,500,000	1,500,000
Eleventh secured corporate bonds	1,500,000	1,500,000
First unsecured convertible bonds	1,634,400	1,634,400
Second unsecured convertible bonds	1,481,800	1,864,300
Add: Accrued interest compensation	9,614	6,339
Subtotal	7,125,814	9,005,039
Less: Current portion	(4,134,400)	(1,500,000)
Non-current portion	\$2,991,414	\$7,505,039

- (1) Please refer to Schedules  $1 \sim 3$  for details of the terms on the above corporate bonds.
- (2) On January 12, 2004, the Company issued its first unsecured domestic convertible bonds (hereinafter referred to as the "Bonds") at face value, totaling \$4 billion. The major terms on the issuance are set forth below.
  - a. Period: 5 years (January 12, 2004 to January 11, 2009).
  - b. Coupon rate: 0% per annum.
  - c. Principal repayment and interest payment

Unless the Bonds are redeemed, repurchased, resold, converted or deregistered before maturity, or other events occur due to regulatory reasons, the principal of the Bonds is to be repaid in lump sum by cash at maturity based on the face value of the Bonds.

### d. Collaterals

The Bonds are unsecured. However, if the Company subsequently issues other convertible bonds secured with collaterals, the rights of the bondholders to claim their credits and the collaterals are set at the same rank as the holders of the convertible bonds issued subsequently.

- e. Redemption of the Company's option
  - (a) During the period from 3 months after the issuance of the Bonds to 40 days before the maturity of the Bonds, if the closing price of the Company's common stock at the Taiwan Stock Exchange is equal to 50% or above the conversion price in effect for a period of 30 consecutive trading days, the Company may redeem 100% of the outstanding bonds in cash at the redemption price calculated based on the predetermined yield rate on redemption within 30 trading days after the above-mentioned 30 consecutive trading days. The yield rate on redemption is 0.20% per annum during the period from 3 months to 3 years after the Bonds' issuance. During the period from 3 years after the Bonds' issuance to 40 days before the maturity of the Bonds, the Bonds are redeemable at their face value.

- (b) During the period from 3 months after the issuance of the Bonds to 40 days before the maturity of the Bonds, if the total amount of the Bonds outstanding after the conversion by the bondholders is less than \$400 million (10% of the total issued amount), the Company may redeem the outstanding bonds in cash in accordance with the terms stated in Paragraph a. above.
- (c) When the Company issues its redemption notice, if the bondholders do not reply before the effective redemption date, the Company may convert the bonds held by those bondholders into common stock at the conversion price in effect at the expiration of the notice period.

### f. Redemption of the bondholders' option

During the period from 30 days before the 3-year maturity of Bond to the date of maturity, the bondholders may require the Company to redeem their bonds in cash at the face value plus interest compensation (i.e. 100.60% of the face value with a yield rate of 0.20% per annum).

### g. Terms on conversion

### (a) Conversion period

The bondholders may convert the Bonds into the Company's common stock during the period from 3 months after the Bonds are issued to 10 days before the maturity of the Bonds.

The bondholders are prohibited from exercising their conversion right during the period from 3 trading days before the announcement of cash or stock dividends to the date of distribution of the cash or stock dividends.

### (b) Conversion price

The conversion price is the lower of the three average closing prices of the Company's common stock during the 10, 15 and 20 trading days before October 3, 2003 multiplied by 115%. If any cash or stock dividends are distributed before October 3, 2003, the closing price used in the computation of the conversion price must be adjusted for the effect of the dividend distribution. If any cash or stock dividends are distributed during the period from the date on which the conversion price is set to the date on which the Bonds are converted, the conversion price is required to be adjusted in accordance with the adjusting formula specified in the bond agreement. The conversion price at the issuance of the Bonds was set at \$28.60. On December 31, 2006, the adjusted conversion price was \$21.85.

#### h. Others

### (a) Entitlement to cash dividends

The bondholders who request to convert the Bonds on a date which is more than 3 trading days before the announcement of cash dividends are entitled to the cash dividends resolved by the stockholders in the current year. The bondholders who request to convert the Bonds 3 trading days before the announcement of cash dividends or later are not entitled to the cash dividends resolved by the stockholders in the current year, but are entitled to the cash dividends resolved by the stockholders in the following year.

- (b) The affiliated companies of the Company may subscribe the Bonds, but do not have the right to convert the Bonds into the Company's common stock.
- (3) On September 6, 2004, the Company issued its second unsecured domestic convertible bonds (hereinafter referred to as the "Second Bonds") at face value, totaling \$4.5 billion. The major terms on the issuance are set forth below.
  - a. Period: 5 years (September 6, 2004 to September 5, 2009).
  - b. Coupon rate: 0% per annum.
  - c. Principal repayment and interest payment

Unless the Second Bonds are redeemed, repurchased, resold, converted or deregistered before maturity, or other events occur due to regulatory reasons, the principal of the Second Bonds is to be repaid in lump sum by cash at maturity based on the face value of the Second Bonds.

### d. Collaterals

The Second Bonds are unsecured. However, if the Company subsequently issues other convertible bonds secured with collaterals, the rights of the holders of the Second Bonds to claim their credits and the collaterals are set at the same rank as the holders of the convertible bonds issued subsequently.

- e. Redemption of the Company's option
  - (a) During the period from 3 months after the Second Bonds are issued to 40 days before the maturity of the Second Bonds, if the closing price of the Company's common stock at the Taiwan Stock Exchange is equal to 50% or above of the conversion price in effect for a period of 30 consecutive trading days, the Company may redeem the outstanding bonds in cash at the face value of the Second Bonds within 30 trading days after the above-mentioned 30 consecutive trading days.
  - (b) During the period from 3 months after the Second Bonds are issued to 40 days before the maturity of the Second Bonds, if the total amount of the Second Bonds outstanding after the conversion by the bondholders is less than \$450 million (10% of the total issued amount), the Company may redeem the outstanding bonds at their face value any time during the 40 days before the maturity of the Second Bonds.
  - (c) When the Company issues its redemption notice, if the bondholders do not reply before the effective redemption date, the Company may convert the bonds held by those bondholders into common stock at the conversion price in effect at the expiration of the notice period.

### f. Redemption of the bondholders' option

During the period from 30 days before the 3.5-year maturity of Bond to the date of maturity, the bondholders may require the Company to redeem their bonds in cash at the face value.

### Terms on conversion

### (a) Conversion period

The bondholders may convert the Second Bonds into the Company's common stock during the period from 1 month after the Second Bonds are issued to 10 days before the maturity of the second Bonds.

The bondholders are prohibited from exercising their conversion right during the period from 3 trading days before the announcement of cash or stock dividends to the date of distribution of the cash or stock dividends.

### (b) Conversion price

The conversion price can be any of the three average closing prices of the Company's common stock during the 1, 3 and 5 trading days before August 24, 2004 multiplied by 103%. If any cash or stock dividends are distributed before August 24, 2004, the closing price used in the computation of the conversion price must be adjusted for the effect of the dividend distribution. If any cash or stock dividends are distributed during the period from the date on which the conversion price is set to the date on which the Second Bonds are converted, the conversion price is required to be adjusted in accordance with the adjusting formula specified in the bond agreement. The conversion price at the issuance of the Second Bonds was set at \$28.50. On December 31, 2006, the adjusted conversion price was \$18.27.

### h. Entitlement to cash dividends

The bondholders who request to convert the Second Bonds during the period from January 1 of the current year to any date which is more than 3 trading days before the announcement of cash or stock dividends are entitled to the cash or stock dividends resolved by the stockholders in the current year. Conversion of the Second Bonds is prohibited during the period from 3 trading days before the announcement of cash or stock dividends to the ex-dividend date.

The bondholders who request to convert the Second Bonds during the period from the date following the ex-dividend date to December 31 of the current year are not entitled to the cash or stock dividends resolved by the stockholders in the current year, but are entitled to the cash or stock dividends resolved by the stockholders in the following year.

Expected rate of return on plan assets	2.75%~3.25%	3.00%~3.50%

### 24. Capital stock

- (1) As of December 31, 2006 and 2005, the authorized capital of the Company was \$36,000,000 thousand and \$33,000,000 thousand, and the paid-in capital was \$29,159,293 thousand and \$27,075,246 thousand, divided into 2,915,929 thousand and 2,707,525 thousand shares of common stocks, respectively, with a par value of \$10 per share.
- (2) On June 23, 2006, the Company's stockholders resolved to increase capital by capitalizing \$1,907,617 thousand of retained earnings. Accordingly, 190,762 thousand new shares were issued with a par value of \$10 per share. The Company's capital stock after the capital increase amounted to \$29,159,293 thousand. The above capital increase was approved by the Financial Supervisory Commission of Executive Yuan on July 12, 2006 as per the Letter Jin-Kuan-Zheng-(1) No. 0950130032 with the effective capital increase date set on August 20, 2006.

- (3) On June 23, 2005, the Company's stockholders resolved to increase capital by capitalizing \$2,461,386 thousand of retained earnings. Accordingly, 246,139 thousand new shares were issued with a par value of \$10 per share. The Company's capital stock after the capital increase amounted to \$27,075,246 thousand. The above capital increase was approved by the Financial Supervisory Commission of Executive Yuan on July 20, 2005 as per the Letter Jin-Kuan-Zheng-(1) No. 0940129447 with the effective capital increase date set on August 26, 2005.
- (4) Details of the common stock converted from the unsecured domestic convertible bonds issued by the Company during the year ended December 31, 2006 and 2005 are set forth below:

	The Year Ended Dec 31, 2006			ar Ended 1, 2005
	No. of		No. of	
	Shares		Shares	
	(in '000)	Amount	(in '000)	Amount
First unsecured convertible bonds	-	\$-	20,211	\$202,111
Second unsecured convertible bonds	17,643	176,430	15,233	152,324
Total	17,643	\$176,430	35,444	\$354,435

### 25. Capital surplus

Under the Company Law, capital surplus arising from share issue premium and endowments received can be capitalized when the Company does not incur losses, provided that the annual amount capitalized cannot exceed 10% of the Company's paid-in capital. The remainder can only be used to offset losses. Additionally, pursuant to the Securities and Exchange Law and the Company Law, capitalization of the capital surplus is not allowed until the following year after the capital surplus is registered. Moreover, capital surplus cannot be used to make up losses unless the legal reserve is insufficient to cover the losses.

### 26. Appropriation of retained earnings and dividend policy

(1) The sections of the Company's Articles of Incorporation that are applicable to the appropriation of the 2005 and 2004 earnings are as follows:

According to Article 26 of the Company's Articles of Incorporation, if there is any profit for a fiscal year, the Company should first make provision for income tax, and make up the losses from prior years, then appropriate 10% of the residual amount as legal reserve. Dividends should be proposed by the Board of Directors and resolved by the stockholders. Bonuses paid to employees should be at least 1% of the total distributed amount and the remuneration paid to the directors and supervisors should not exceed 5% of the total distributed amount. The Company is currently at the stable growth stage. To facilitate future expansion plans, distribution to stockholders are in forms of both cash and stocks with proportions at 0%~50% and 100%~50%, respectively. To maintain the Company's earnings per share at a certain level and in consideration of the impact of stock dividends on the Company's financial performance, the proportions of cash and estimated earnings per share for the year in which the dividends are distributed decreased by more than 20%, compared to prior year. The Company also could adjust the cash and stock dividends with proportions at 100%~50% and 0%~50% based on the financial situation, respectively.

(2) The Company's board of stockholders resolved to amend the company's policy of dividends and distribution of earnings (effective from 2006) on June 23, 2006. The newly revised policies are set as follows:

According to Article 26 of the Company's Articles of Incorporation, if there is any profit for a fiscal year, the Company should first make provision for income tax, and make up the losses from prior years, then appropriate 10% of the residual amount as legal reserve. Dividends should be proposed by the Board of Directors and resolved by the stockholders. Bonuses paid to employees should be at least 0.5% of the total distributed amount and the remuneration paid to the directors and supervisors should not exceed 5% of the total distributed amount. The Company is currently at the stable growth stage. To factice future expansion plans, dividends distributed to stockholders are in the form of both cash and stock and the proportion of cash dividends shouldn't be below 10% of total dividends.

### (3) Legal reserve

Pursuant to the Company Law, the Company is required to set aside 10% of its annual after-tax net income as legal reserve until the balance of such reserve equals the Company's paid-in capital. Utilization of the legal reserve is limited to offsetting deficits and capital increase. Appropriation of the legal reserve as cash dividends is prohibited.

### (4) Special reserve

If there are any negative stockholders' equity items recorded by the Company, such as unrealized loss on the decline in market value of long-term equity investments and cumulative translation adjustments, the Company is required to set aside an amount equal to the amount of the negative stockholders' equity items to the special reserve from the after-tax net income. If the negative stockholders' equity items are subsequently reversed, an amount not exceeding the reversed amount can be appropriated from the special reserve.

(5) Appropriation of the 2005 and 2004 earnings as resolved by the stockholders on June 23, 2006 and June 23, 2005, respectively, is set forth below:

			Dividend	l Per Share
_	Appropriated Earnings		(in dollars)	
	2005	2004	2005	2004
Cash dividends to common stockholders	\$4,905,302	\$4,922,772	\$1.80	\$2.00
Stock dividends to common stockholders	1,907,617	2,461,386	0.70	1.00
Cash bonus to employees	70,000	80,000		
Remuneration to directors and supervisors	60,400	43,800		

Appropriation of the 2005 and 2004 earnings were calculated by the following formula. After distributing the bonus to employees and the remuneration to directors and supervisors, the after-tax basic earning per share for 2005 and 2004 decreased to \$4.19 from \$4.23 and to \$4.76 from \$4.81, respectively.

Formula:	After-tax net income — Cash bonus to employees — Remuneration to directors and supervisors
	Weighted-average number of outstanding shares(After retroactive adjustment)
2005	=(12,223,911 thousand dollars – 70,000 thousand dollars –60,400 thousand dollars)/ 2,886,869thousand shares= $$4.19$
2004	=(12,084,669 thousand dollars–80,000 thousand dollars–43,800 thousand dollars)/2,512,726thousand shares =\$4.76

(6) Information relating to the appropriation of the Company's 2006 earnings as proposed by the Board of Directors and resolved by the stockholders in 2007 is published on the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

### 27. Operating revenues

	The Year Ended	The Year Ended
	Dec 31, 2006	Dec 31, 2005
Marine freight income	\$128,862,289	\$123,455,891
Ship rental income	17,990,165	13,788,745

### 4. Endorsements and guarantees for related parties

Endorsements and guarantees issued by the Company for its related parties are as follows: (expressed in thousand dollars)

	Decemb	December 31, 2006		December 31, 2005	
TCT	USD	76,292	EUR	41,213	
CCT	USD	53,000	USD	18,353	
ITS	USD	10,000	USD	-	

### 5. Significant contracts with related parties

- (1) The Company has entered into an agreement with EIC for management, computer information, Shipping affairs, and consulting services. Except payments under behalf are charged on actual amounts, the remaining fees are charged on an hourly basis or by cost-added method. The contract came into effect on July 1, 1996 and continued to be in effect unless terminated.
- (2) The Company has entered into an agency agreement with EIC. Under the agreement, EIC has been acting as the Company's agent for cargo forwarding and collection of freight since 2002. As of December 31, 2006 and 2005, the amount receivable under the agency agreement was \$85,577 thousand and \$83,602 thousand, respectively.
- (3) The Company has entered into an agreement with ESRC. Under the agreement, ESRC should provide security service in the Taipei office, Kaohsiung office, and container yards. The service fees for Taipei office, Kaohsiung office and container yards were \$940 thousand dollars and \$1,614 thousand dollars, respectively. The fees are paid monthly. About long-term contracts, please refer to Note G.
- (4) The Company has entered into agency agreements with its related parties to manage petty cash required by their vessels, and payments of crew salaries and insurance premiums in Taiwan. The transactions are recorded under "agency reciprocal accounts". As of December 31, 2006 and 2005, the debit balances of the accounts are as follows:

	December 31, 2006	December 31, 2005
EIS	\$10,748	\$6,758
GESA	4,895	4,557
Total	\$15,643	\$11,315

- (5) The Company has entered into agency agreements with its related parties, under which the related parties act as the Company's overseas agents to deal with the port formalities related to foreign ports, such as arrival and departure of the Company's ships, cargo stevedoring and forwarding, collection of freight and payment of expenses incurred with foreign ports. The transactions are recorded under "agency accounts". As of December 31, 2006 and 2005, the balances of the accounts are as follows:
  - a. Debit balances of agency accounts

	December 31, 2006	December 31, 2005
EIC	\$53,517	\$47,966

# G. COMMITMENTS AND CONTINGENT LIABILITIES

1. Details of the stand-by letters of credit issued by the banks on behalf of the Company are as follows: (expressed in thousand dollars)

Guarantor	December 31, 2006		December 31, 2005	
Bank of America	USD	5,000	USD	5,000

2. Endorsements and guarantees issued by the Company are as follows: (expressed in thousand dollars)

Companies receiving guarantees	December 31, 2006		December 31, 2005		
TCT	USD	76,292	EUR	41,213	
CCT	USD	53,000	USD	18,353	
ITS	USD	10,000	USD	_	

- 3. A former stockholder of the Company sold some of its shares through issuance of global depository receipts (GDRs). The issuance of GDRs was approved by the SEC on June 19, 1996 as per the Letter (85) Tai-Cai-Zheng (1) No. 35410. On August 2, 1996, the GDRs were approved by the UK governing authority to be listed on the London Stock Exchange and were issued in Asia, Europe and the US. The initial number of units issued was 5,449,592, representing 54,495,920 shares of the Company's common stock at NTD50.50 per share, and the number of supplementary units issued was 817,438. In total, the number of units issued was 6,267,030, representing 62,670,300 shares of the Company's common stock at NTD50.50 per share, and the GDRs issued amounted to USD115 million. Another 2,053,122 units, representing 20,531,279 shares of the Company's common stock, were issued during the period from 1997 to December 31, 2006. As of December 31, 2006, 7,924,786 units were redeemed and 395,366 units were outstanding, representing 3,953,709 shares of the Company's common stock.
- 4. In 1999, SGTC was indicted for a dispute arising from mishandling of imported goods. SGTC has referred the lawsuit to its lawyer. As of December 31, 2006, the maximum amount of compensation claimed was RMB10,527 thousand plus the associated interest. In 2000, the Civil Court in Shenzhen ruled in favor of SGTC. However, the plaintiff appealed to a higher court, and the court ruled against SGTC. As a result, certain transportation equipment of SGTC was bonded by the court. As of December 31, 2006, the book value of the bonded transportation equipment amounted to RMB8,746 thousand. SGTC did not agree with the court's ruling and filed an appeal. Since the appeal was pending the court's ruling as of the date on which the financial statements were issued, no provision has been made for the possible loss.
- 5. As of December 31, 2006, the medium-term loan facilities granted by the financial institutions with the resolution from the Board of Directors to finance the Company's purchase of new containers and general working capital requirement were NTD 17,503,640 thousand and the unutilized credits was NTD 9,080,000 thousand.
- 6. As of December 31, 2006, details of the loading and discharging equipment acquired to support the operations of the No. 4 and the No. 5 Container terminal at Kaohsiung Harbor were as follows: (expressed in thousand dollars)

Item	Contract Amount		Amou	Amount Paid		Amount Accrued	
Gantry cranes	USD	16,650	USD	14,985	USD	1,665

- 2. The following summarizes the methods and assumptions used in estimating the fair value of financial instruments:
  - a. The fair values of short-term financial instruments are approximated using their carrying value. Since they are short-term in nature, it is reasonable for their fair value to be determined based on their carrying value. This method applies to cash and cash equivalents, notes and accounts receivable (payable), refundable deposits, other financial assets, restricted assets, short-term debts, short-term bills payable and guarantee deposits received.
  - b. For financial assets at fair value through profit or loss, available-for-sale financial assets and held-to-maturity financial assets with quoted market price available in the active market, the fair value is determined using the quoted market price. When there is no quoted market price for reference, a substitute valuation technique used to measure the fair value is one which incorporates all factors that market participants would consider in making estimations and assumptions for setting a price.
  - c. Held-to-maturity financial assets are those with fixed or determinable payments and a fixed time-to-maturity which the Company has positive intent and ability to hold. Upon measurement, held-to-maturity financial assets are carried at amortised cost. Any profits or losses incurred due to changes in fair value should be recognized in income statement when recognizing impairments or amortization.
  - d. Financial assets accounted for by the cost method, composed of unlisted stocks or those not actively traded in the market, and had no significant influence are measured at cost in compliance with the statement of financial accounting standards. For debt investments with no active market, the carrying value is used to estimate its fair value when there is no market price for reference.
  - e. Long-term accounts receivable are interest-bering financial assets with floating interest rate, thus the carrying value is close to the fair value.
  - f. Fair values of long-term loans are estimated based on the present values of future cash flows. For bank loans associated with floating interest rate, the carrying value represents its fair value.
  - g. Fair values of corporate bonds payable are determined as the quoted market prices when available. When the quoted market prices are not available, fair values are estimated based on financial information or other information.
  - h. Financial liabilities carried at costs are equity-linked instruments which are to be settled with equity instruments with no quoted market prices or with fair values that can not be reliably measured. Such instruments are measured at costs in accordance to the rules stipulated in the "Guidelines for Preparation of financial Reports by Securities Issuers".
  - i. The fair values of derivative financial instruments, except for corporate bonds payable mentioned above in point g which should be measured at costs, are determined based on the estimated amounts to be received or paid if the Company is to terminate the contract on the balance sheet date. Unrealized gains or losses arising from unsettled contracts are generally included. Ask price form counterparties are available for reference in setting fair values for the Company's derivative financial instruments.

3.The fair value of financial assets and liabilities either determined with the public quoted price in the active market or estimated using valuation methods are as follows:

a. The unrealized profit that the Company recognized for the year ended December 31, 2006 and 2005 due to changes in fair value were 437,602 thousand and 45,158 thousand, respectively.

b. The financial assets with potential fair value risk of interest change for the year ended December 31, 2006 and 2005, were 43,654 thousand and 0 thousand, respectively, and the financial liabilities were 45,678 thousand and 0 thousand. The financial assets with potential cash flow risk of interest change were 7,152,689 thousand and 11,366,977 thousand, respectively, and the financial liabilities were 22,112,794 thousand and 26,447,276 thousand.

### 4. Risk Policy and hedging strategy

The financial instruments held by the Company, other than derivative instruments, are composed of cash and cash equivalents, stocks, funds, bank loan, and corporate bonds. Such financial instruments are held for the maintaining adequate operating capital. The Company also held other accounts receivable and payable generated from operating activity.

The transactions associated with derivative instruments mainly includes interest rate swap and oil swap. The primary objective is to avoid the interest risk and fuel price variation arising from operating and financing activities.

The primary risks of financial instruments are cash flow risk, associated with interest fluctuations exchange rate risk, credit risk, and liquidity risk. The risk management policies are set forth below:

### Cash flow risk associated with interest rate variations

The Company's major exposure to cash flow risk associated with interest rate variations comes primarily from long-term financing with floating interest. The Company adopts a combination of fixed interest and floating interest rates methods in issuance of loans to manage such interest rate risks. In addition, the Company also engages in interest rate swaps to minimize cost of borrowings.

The carrying values of the Company's financial instruments exposed to interest rate are summarized in the order of maturity as follows:

December 31, 2006:

### a. Fixed interest rate

	Within 1					Over 5	
	year	1~2years	2~3years	3~4years	4~5years	years	Total

The interest of financial instruments associated with the floating interest rates is re-measured within 1 year period and the interest for financial instruments associated with the fixed interest rate, on the other hand, is fixed to maturity. The financial instruments not included in the above table are not subject to interest payments and thus, do not inherent interest rate risk. As a result, such instruments are not included in the table.

### Exchange rate risk

Although the Company is exposed to exchange rate risk, the Company is entitled to stable cash inflows denominated in foreign currencies for meeting cash outflows denominated in foreign currency due to the fact that the Company operates in international transportation industry. In order to minimize exchange rate risk, the Company also engages in activities, such as borrowing of US dollar loans...etc.

### Credit risk

The Company only deals with third parties with good credit standings. In compliance to the Company's policies, strict credit assessment is to be performed by the Company prior to proceed with credit trading with customers. The occurrence of bad debts is also minimized by the Company's practices in continuously assessment of collections on accounts and notes receivables and making adjustments to the credit terms granted for each customer based on the conclusion drawn from such assessment. Moreover, the Company is restricted to engage in credit trading with other business units operating under other functional currencies unless permission from the highest instruction unit has been received.

Other financial instruments held by the Company are subject to credit risk arising from the failure of counterparty to settle their contractual obligations as and when they fall due. Since the Company only deals with third parties with qualifying credit standings, no collateral is required by the Company which also represents that the maximum credit exposure amount equals to the relative carrying value. The maximum credit exposure amount for various financial assets held by the Company is analyzed below:

	December 31, 2006		December 31, 2005	
Financial instruments	Carrying value	Maximum credit exposure amount	Carrying value	Maximum credit exposure amount

Corporate bonds	11,131	11,131	12,581	12,581

Credit risk refers to the risk of counterparty's failure to settle contractual obligations as and when they fall due. The credit risk presented in the above table is the positive net amount of all contracts with positive fair values on the balance sheet date. In another word, the credit risk amount presented is the loss incurred by the Company in the case of counterparty's default. Since the counterparties of the Company are business enterprises or financial institutions with good credit rating, the potential credit risk event is remote. In addition, since the Company is not concentrated in transactions with one individual or counterparty, no concentration of credit risk is evident.

### Liquidity risk

The Company achieves the objectives of effective use of capital and stabilization of capital by adjusting capital through the use of cash and cash equivalents, financial instruments held for trading, bank borrowings, and corporate bonds...etc. The operating capital of the Company is sufficient in meeting capital on demand; therefore, no significant liquidity risk is expected to incur.

### 5. Hedging activity

### Cash flow hedge

As of December 31, 2006, the Company holds five oil swap contracts in avoiding fuel fluctuations. The Company also engaged in oil hedging transactions to minimize oil cost arising from variation of oil price. The Company compared the oil price and settled the contracts by cash to offset the oil cost(a expected transaction) and to avoid the cash flow risk from oil price monthly. As of now, the total fair value of oil hedging transaction was 66,820 thousand, the effectiveness of hedging was within a range of 80% to 125%. In addition, the Company hold three interest rate swap contracts to avoid the variation between floating and fixed rate, the effective hedge accounts for 80% to 125%.

i. Derivative financial instruments undertaken by the investees

Please see Schedule 12.

#### 3. Information on Mainland China investments

(1) Details of investments in Mainland China

Please see Schedule 13.

(2) Significant transactions conducted directly or indirectly with the investees in Mainland China

None.

#### L. SEGMENT INFORMATION

#### 1. Financial information by industries

The Company is engaged in only one single industry, i.e. international marine transportation and shipping agency. Therefore, no disclosure is required.

#### 2. Financial information by geographical areas

The Company is engaged in international marine transportation. Dealings with foreign ports, such as port formalities relating to arrival and departure of the Company's ships, cargo stevedoring and forwarding, collection of freight, and payment of expenses incurred with foreign ports, are handled by overseas shipping agents. Therefore, no disclosure is required.

#### 3. Export information

As the Company is engaged in international marine transportation, every vessel sails between the major harbors in the world. Therefore, no export sales are reported.

#### 4. Information on major customers

The Company provides services to customers all over the world. No single customer of the Company accounts for more than 10% of the Company's operating revenues.

#### Note 1: Nature of loans extended

"1" denotes the loans extended to the companies which have transactions with the Company or its subsidiaries. The annual amount of the transactions is stated accordingly.

"2" denotes the loans extended to the companies which require short-term financing. The reason for short-term financing is stated accordingly.

#### Note 2: Limit on loans extended

1. According to the Company's credit policy, the total amount of loans granted to a single company should not exceed 20% of the net worth stated in the latest financial statements. The calculation is as follows:

The Company: NTD\$ 56,454,665 thousand \* 20% = NTD\$11,290,933 thousand

Peony: US\$1,240,376 thousand \* 20% = US\$248,075 thousand

2. According to the Company's credit policy, the total amount of loans granted by the Company or its subsidiaries should not exceed 40% of the net worth stated in the latest financial statements. The calculation is as follows:

The Company: NTD\$ 56,454,665 thousand \* 40% = NTD\$22,581,866 thousand

Peony: US\$1,240,376 thousand \* 40% = US\$496,150 thousand

Evergreen Marine Corporation and Subsidiaries — Greencompass Marine S. A. Derivative financial instrument undertaken by the Company and its investee December 31, 2006

#### 1. Derivative financial instruments:

(1) The contract (notional principal) amounts and credit risk (expressed in thousand dollars)

	December 31, 2006						December 31, 2005					
			No	tional			No	tional		_		
			Prii	ncipal			Principal					
			(Co	ntract	(Contract							
Financial Instruments			Am	ount)	Credi	t Risk	Ar	nount	Credit Risk			
Interest	rate	swaps	USD	76,317	USD	239	USD	108,176	USD	598		
(IRS) Foreign exchange option		ge	USD	6,000	USD	-	EUR	3,000	USD	-		

The above credits risk amounts are based on the contracts with positive fair values on the balance sheet date and represent the possible loss that will be incurred by the Company in the event of counterparties' default. The counterparties of the Company are all well-known banks with good credit ratings. Thus, the credit risk is assessed to be remote.

#### (2) Market risk

The interest rate swaps are utilized to hedge against fluctuations in interest rates. And the foreign exchange options are derivative financial instruments which are held for trading. Periodic reviews are conducted for evaluating the level of Subsidiary's exposure to market risk, and a stop-loss mechanism has been established to minimize the impact of market risk on the Subsidiary's operations.

(3) Liquidity risk, cash flow risk and the amount, timing and uncertainty of demand for future cash flow.

As no principals are exchanged upon settlement of the interest rate swaps and foreign exchange options , no significant demand for cash flow is expected. Therefore, the Subsidiary's working capital is assessed to be adequate and no funding risk is dominant. In addition, since the interest rates, exchange rates and prices are fixed, cash flow risk is determined to be remote.

(4) The types, objectives and strategies of holding derivative financial instruments

The derivative financial instruments undertaken by the Company are held for trading and non-trading purposes. The primary objectives of derivative financial instruments held for non-trading purposes are to mitigate risk of debt obligations and commitments arising from fluctuations in interest rates and exchange rate. The hedging strategy of the Company focuses on mitigating market price risks. On the other hand, the primary objective of the derivative financial instruments held for trading purposes is to profit from exchange rate and price differentials.

#### (5) Disclosures of derivative financial instruments in the financial statements

#### 1) Interest rate swaps:

The contracts are settled based on the difference between the spot interest rate and contracted interest rate. The amount received and paid upon settlement is recorded as a deduction from and an addition to the interest expense on shipping finance, respectively.

#### 2) Foreign Exchange Option:

As the Company has actual position in the underlying assets, full settlements are conducted at expiration of the contracts. The difference between the spot exchange rate and the contracted rate is recorded as foreign exchange gain or loss upon settlement.

#### 2. Fair values of financial instruments

	D	December 31, 2006				December 31, 2005			
Derivative financial	Carr	ying	Fa	Fair		ying	Fair		
instruments	Value		Va	lue	Va	lue	Value		
Interest rate swaps	USD	134	USD	134	USD		USD	(126)	
Foreign exchange options	USD	(5)	USD	(5)	USD	(166)	USD	(166)
